## Objectives

This program was developed for those individuals, as well as anyone else seeking to further their knowledge concerning defect solutions. For this purposes, countermeasures can be defined as an activity that takes place to determine the cause of, and solution for, defects found in a moulded part. This activity usually takes place while parts are being moulded and occurs when the normal production of acceptable parts is interrupted by the unexpected production of one or more defective, unacceptable parts. Participants will learn detail on what, why, when, where and how defects occurs and how to countermeasures the defects.

## Course Contents

1. Type of defects.  
Understanding type of defects, Appearance defects or Dimension defects
2. Defects terminology.  
Understanding the correct terminology of the defects.
3. Defects analysis and failure of products.  
Defects causes, how it happened.  
Failure of products.  
Study of moulding defects.
4. Defects countermeasures.  
Defects countermeasures during design stage.  
Defects cause by plastic material.  
Defects cause by mould.  
Countermeasures by parameter setting.  
How to eliminate defects and avoid from happening again.

## Daily Schedule
